

# SHELF BRACKET INSTALLATION

## STEP 1

Determine location on standard, where you want the shelf to be.  
*NOTE: Ensure each bracket is placed at the same location on each standard (left, center & right).*

## STEP 2

Insert tabs on back of bracket, in to slots on standard and press downward.

## STEP 3

Use a rubber mallet to gently tap bracket down into slot. Once secured in place, you should not be able to pull the bracket out.  
To remove bracket, use mallet to tap bottom of bracket upwards.

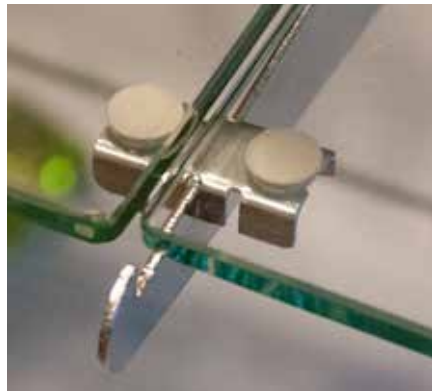

## STEP 4

Add shelf rests by sliding slot on to top of bracket. Place one rest at the back of the bracket, and another at the front. Rests have 3 slots; use left slot for brackets located on the left side of your case. Use the center slot for brackets in the center of showcase and use right notch for brackets on the right side of showcase.

Once all brackets and shelf rests are in place, you are ready to install the glass shelves.
